

Automatic Length Stop RAZORGAGE xT – ANDROID

RazorGage xT is a programmable servo controlled positioner. It is designed for less demanding applications and can be used as a stop gage only. Equipped with a 7" Android tablet. Its Android based software features intuitive operation, fraction keys, infinite preset hot keys, and a Work Order screen where you can create and save thousands of cut lists. Supports bar code operation and remote serial communication.

FEATURES

- Entry level Android based software
- Works in INCH and MM
- Incremental or absolute movements
- Fraction keys
- Infinite preset "hot Keys"
- The Preset Grid Scaling Slide Bar allows you to adjust the Preset button size or change to list view to scroll through your Presets using the swipe feature.
- Unload button to move the stop predefined loading position
- Step by step guided calibration model
- Download, make and edit cutting lists via Gmail
- Virtually unlimited cut list size and quantity
- Cut lists can be restored to original quantities after use or even multiplied should you want to make several "kits" of parts at once.
- Can sort any column ascending or descending

OPTIONALS

- Tool safe sensor
- Gage side table
- Opposite side table
